Changing Your View

The part which roof windows play in attic rooms has massively influenced the way we look at interior design. Whether for a home or a commercial project, our huge choice of roof windows can be used in a range of different ways. Our close-grain pine will look sensational for years while our sleek, stylish frames provide a bigger glazing area to let in more light. With all these benefits and more it's not hard to see why FAKRO roof windows become a focal point in their own right and prompt such consistently positive comment.

For those of you looking to achieve the highest levels of Energy Saving, BREEAM, Passive House or "EnerPHit" our triple and quadruple-glazed non-vented FTT range offers an exceptional standard of performance. At the heart of all our products FAKRO provide a high level of security, highly resilient hinges and seals, and a standard of timber treatment which we believe is second to none. FAKRO uses responsibly sourced timber and as well as natural pine, you can opt for white PU-coated, white acrylic painted, pine or PVC

products, all of which are available in conservation style. BBA and FSC® certified products together with warranties of 10 years for windows and 20 years for glazing give you peace of mind that the name FAKRO is synonymous with quality.

What makes a FAKRO roof window better?

FAKRO roof windows are designed to provide a focal point for any room whether you use them individually or in combinations. Their stylish appearance is matched by the highest standard

of manufacturing and finishing which means you can rest assured they will go on looking good for years to come. Our windows offer a perfect combination of style, sustainability, security and long

design life. To achieve such high performance involves ongoing refinement and improvement to every roof window that we design.

1

Ample natural light

The design of FAKRO roof windows provides appropriate illumination of the room within the loft space. Specially shaped profiles of the frame and sash as well as an air inlet location in the upper part of the frame allows for the influx of high quantities of natural light.

2

Timber quality

The pine we use offers the clearest visual evidence of our roof window quality. Not only does its close grain look stylish, we obtain timber from FSC® certified sources. Our double vacuum process using water-borne preservatives provides lasting dimensional stability and all windows are finished with two coats of environmentally friendly lacquer. Compare this with another leading manufacturer which states - "The timber has received basic treatment and a finished coating at the factory. It must receive further treatment at least every four years and whenever required. Windows exposed to strong heat, strong sunlight and/or high levels of humidity (e.g. in kitchens or bathrooms) must however receive treatment at least every two years". We therefore actively encourage customers to compare our window finishing with that of other manufacturers.

3

Windows for bathrooms, wetrooms and kitchens

FAKRO offers two types of roof window for rooms in which high levels of humidity are created. You have the choice of either white polyurethane-coated pine or PVC in white, golden oak and pine finishes. So, whether you want to match existing windows and doors or have a smooth timber finish in white, FAKRO has the perfect solution. FAKRO PVC veneers also achieve the highest level of measurable performance - Class A - EN12608.

4

Automatic air ventilation in all windows

Many manufacturers use a standard manually operated vent which is inefficient, causing unnecessary heat loss. The FAKRO V40P automatic vent which is installed in FAKRO pine roof windows is activated by changes in atmospheric pressure. It provides the optimum balance of fresh air regardless of weather conditions.

5

Exceptional security

FAKRO's TopSafe® system provides peace of mind that our roof windows offer exceptional burglary resistance. In contrast to products which break simply by applying foot pressure, TopSafe provides additional hinge and lock reinforcement to prevent the sash from being forced. A European Standard (EN13049) now means you can compare roof window security and all FAKRO products achieve a minimum of Class 3. FAKRO also manufactures a standard centre pivot window, the FTP-V P2 Secure, which has security glazing.

6

The highest level of energy saving performance

What really sets FAKRO windows apart is their low level of heat loss. Unlike some manufacturers who provide U-values just for glazing units, FAKRO provides information for the whole window. When comparing our performance with other products you will see how our non-vented, quadruple glazed FTT U8 Thermo, with a single glazing unit area a U-value of 0.58 W/m²K, leads the market. Our standard FTP-V centre pivot windows also offer a level of performance which competing windows invariably fail to match.

7

Warm glazing spacers

Many roof windows use metallic spacers to separate panes and these can encourage condensation to form by forming a cold 'bridge' between them. By contrast, FAKRO uses only warm spacers in order to ensure that this otherwise common problem does not affect our products.

8

Ease of installation

Our easy to use "bracket fix" installation system enables windows to be fitted either to rafters or battens. Windows can also be fitted onto sarking.

9

Performance Guarantees

Whether buying natural pine, PU-coated pine or PVC FAKRO offers a 10-year warranty for all windows and a 20 year warranty on glazing units. We also offer a no quibble lifetime warranty against damage by hail stones.

10

We don't just do white.

FAKRO roof windows can be manufactured in any colour from the RAL classic palette. That's over 200 colours customers can specify to special order for their chosen projects. Our standard natural pine, white or pine PVC and white PU coated roof windows from stock in just 3 days.

PLEASE NOTE: THE STANDARD COLOUR FOR THE EXTERNAL PROFILES OF FAKRO ROOF WINDOWS IS UMBER GREY/BROWN RAL 7022. OTHER COLOURS ARE PRICED ON REQUEST.

Certificates

One of the key factors differentiating manufacturers from one another is certification of products. At FAKRO we continually look for ways to innovate and improve our designs, not just with new roof windows but existing ones. In 2012 this yet again enabled us to set an industry standard as we achieved Passive House certification of our industry leading quadruple-glazed FTT U8 Thermo. The FTT U8 offers an amazing U-value of 0.58 W/m²K and provides the ideal solution for airtight designs.

NBS Plus - FAKRO specification clauses are available via NBS Plus. This enables concise, technically accurate and up-to-date information in relation to our extensive range of roof windows and roofing accessories to be copied and pasted.

In the same way, we led the market by becoming the first roof window manufacturer to secure BBA certification - as long ago as 2002. Today, many more of our products are accredited including our popular ranges of centre pivot, top hung and pivot and side hung windows.

This includes products in conservation style and the highly thermally efficient FTT U6 triple-glazed window while, for specifiers and buyers in Ireland we also have Irish Agrément Board (IAB) certification.

The NHBC accepts the use of Fakro Roof Windows, when installed and used in accordance with BBA certificates in relation to NHBC Standards.

Our roof windows offer scope for you to buy or specify products using timber from sustainable sources; indeed we are the only such manufacturer to offer FSC® certification for the higher quality, close-grain pine which we use. We also design all windows to be stripped down for recycling of all parts which, combined with the use of sustainable timber, shows the extent of our commitment to environmental issues.

TÜV SÜD accreditation is currently less well known in the UK but in 2011 UKAS appointed it as a Notified Organisation for construction products. TÜV SÜD partners manufacturers of all kinds of building materials to ensure that quality, safety and environmental sustainability requirements are met. By securing accreditation, FAKRO has once again been among the first to confirm its commitment to key quality standards.

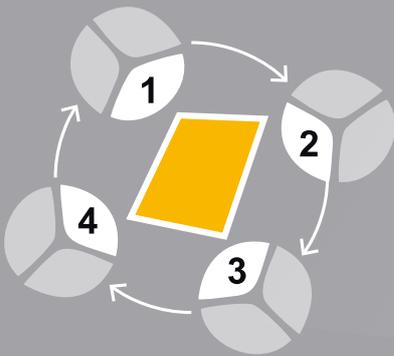

CE marking provides a passport that enables a construction product, irrespective of its origin, to be legally placed on the market of all EU member states. Unlike some manufacturers, FAKRO declares full details of performance for all points which make up a CE mark, yet more evidence that our products exceed minimum standards for health, safety and economy of energy.

NEW DIMENSION OF INNOVATION

thermoPro

Technology

PROFI and LUX class roof windows are manufactured using **thermoPro** technology. The solutions introduced ensure improved quality and parameters of windows. **ThermoPro** technology increases energy-efficiency performance, provides greater durability, ensures excellent tightness and facilitates the installation process of roof windows.

BETTER THERMAL INSULATION OF WINDOWS

- Reduced heat loss and lower heating bills
- New version of low emission coating on the glass
- Introduction of insulation inserts in the bottom corners of the sash aimed at enhancing window's energy-efficiency performance

GREATER WINDOW TIGHTNESS IN TERMS OF AIR PERMEABILITY

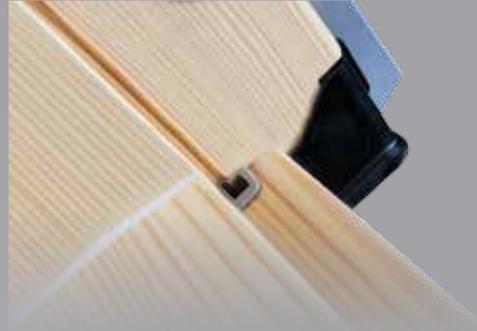

Windows manufactured using **thermoPro** technology feature 3rd and 4th tightness class according to EN12207, thus reducing the amount of air penetrating into the room. It is particularly important for mechanical ventilation.

GREATER WOOD DURABILITY
THANKS TO WATER
DRAINAGE CHANNELS

Special water drainage channels are introduced in the lower corners of the frame to discharge water from condensation and potential leakage caused by, e.g. damaged external aluminium profiles. Wooden profiles are less exposed to the moisture, which adds to their durability.

EASIER
INSTALLATION
GREATER COMFORT
OF WORK

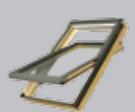

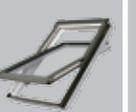

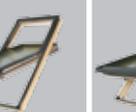

New brackets facilitate installation work and increase the ability to adjust roof windows during their installation. In addition, the use of **Torx screws** streamlines installation process of roof windows.

Centre pivot roof windows are still the most popular design, with a wide variety of options including highly energy-efficient windows suited to airtight construction, burglar-resistant windows (particularly suited to low pitch roofs and multi-occupancy buildings). All can be rotated through 180° to clean the outer pane from within the room. A choice of natural pine, white PU-coated pine and PVC is available.

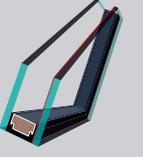

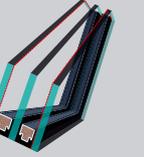

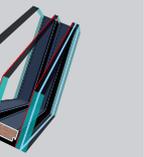

Top hung and pivot dual function roof windows provides total flexibility of use. When open, the top hung function provides an unrestricted field of view at a lower height than a centre pivot window while centre pivot operation enables the sash to be rotated through 180° to clean the outer pane from within the room. A choice of natural pine, white PU-coated pine, white acrylic and PVC is available.

High pivot roof windows function in the same way as a centre pivot window but with the axis of rotation slightly higher in the frame to enable even taller people to walk up to the open window. This enables a greater glazing height to be achieved without adding to the window's width. With scope also to choose a twin sash window in a single frame (the FDY-V proSky Duet window), this can extend up to 2.35 metres.

The **Balcony window** is the ultimate, modern twin sash window. With the top sash opening as a top hung window, the bottom sash with laminated internal glazing opens from the bottom to reveal built-in balustrades.

L-shaped windows provide scope to take any of Fakro's standard roof windows into a vertical wall. This gives a much extended field of view and a bigger glazing area which maximises the use of natural daylight.

Conservation roof windows are designed to meet planning requirements in conservation areas or for the sensitive development of older buildings. In addition to all our standard windows being available in conservation style, bespoke commissions are routinely undertaken.

10 TIPS HOW TO SELECT A ROOF WINDOW

1

HOW WILL YOU MAKE A HOME?

- Choose the correct type of window to suit your environment.
- Classic centre pivot windows make the windows easy to clean as the sash will swivel to allow cleaning of the outside on the inside!
- Top hung and pivot windows give an unrestricted view at a lower height than a standard centre pivot window.

2

HOW MUCH DAYLIGHT DO YOU NEED?

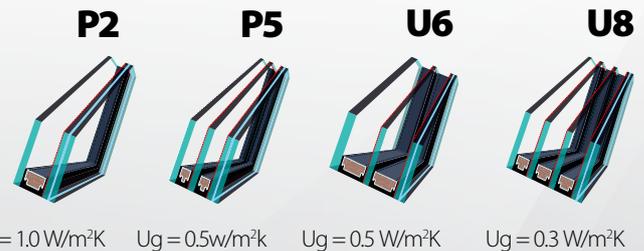

- The higher from the floor a roof window is fitted will provide optimal illumination of the room.
- The German standard DIN 5034-1, 4.2.2a states "the upper edge of the window (or windows) transparent surface shall be positioned at least 220cm from the floor level".

3

WHICH GLAZING UNIT TO CHOOSE?

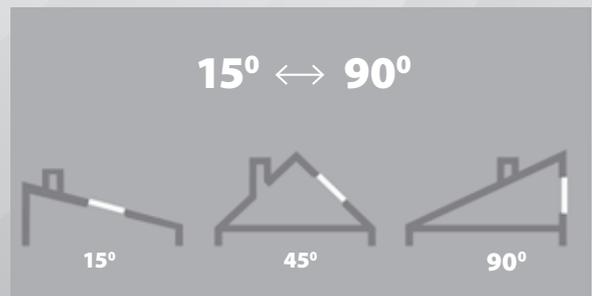

- For windows above head height you should use a laminated glass. If the glass shatters a plastic membrane between the two sheets of glass retain the shards.
- Energy efficient triple-glazed units ensure exceptional thermal efficiency and can almost eliminate heat loss altogether.
- Other glazing choices include; tinted, obscure, reflective and self-cleaning glass.

4

WHAT IS YOUR ROOF PITCH?

- Most roof windows are well suited for a roof pitch of between 15 and 90 degrees. However, the installation pitch range may differ for certain types of windows.
- For flat roofs you can choose between standard domed or non-domed designs.
- To ensure the flow of water from the glass surface of non-domed windows, the window should be installed with a pitch of at least 2 degrees.

5

CORRECT CHOICE OF FLASHING

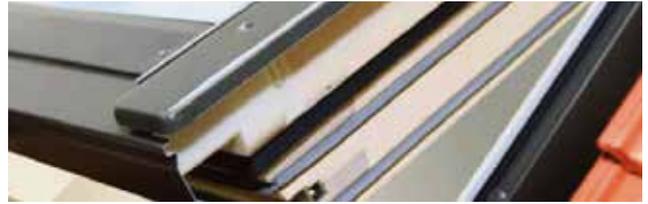

- Enables roof windows to be installed with any type of roof covering
- Can be fitted at 3 key depths:
 - Standard depth and ideal for tiles such as the Double Roman
 - 3cm higher than the standard depth, for high profile tiles such as the Bold Roll
 - 3cm deeper than the standard depth, for where a recessed style is required.
- Ideal for conservation roof windows which invariably need to sit low within the roof line.

6

SUPER SAVINGS WITH HIGHLY **ENERGY-EFFICIENT** WINDOWS

- A well-insulated roof can be let down by a poorly insulated window which will cause heat loss.
- Standard double glazed windows with a thermally insulated glazing unit and flashing may suffice.
- For increased performance you should consider a highly energy-efficient roof window specially designed and supplied with insulating flashing.

7

WILL YOUR ROOF WINDOW BE FITTED IN ROOMS WITH **ELEVATED** HUMIDITY?

- Wooden windows can look very attractive but there is a degree of maintenance required to retain their ultimate appearance, one solution is to specify windows that have a double coat of white polyurethane.
- PVC profile windows with steel reinforcement are a practical solution for bathrooms and places where regular maintenance is difficult. PVC finishes include White, Golden Oak and Pine.

8

MANUAL OR **ELECTRIC** CONTROL?

- Wireless technology is available to operate your roof windows.
- Z-Wave is a wireless protocol for communication between household appliances. It combines into a single network electric devices such as: lighting, thermostats, alarms, computers, telephones, air conditioning, electric windows and blinds.

9

ENHANCED ANTI-BURGLARY **RESISTANCE?**

- Easily accessible roof windows, especially when the garage is adjacent to the house, should be protected from burglary.
- You should always fit reinforced windows with toughened external glass in these situations.
- The FAKRO TopSafe system provides the ultimate in safety and helps prevent break-ins.

10

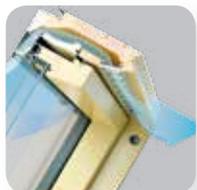

HOW TO PROTECT AGAINST HEAT AND **SUNLIGHT?**

- Contemporary awning blinds can be up to eight times more efficient than internal blinds in terms of passive heat reduction while still allowing light through.
- As well as heat absorption, solar powered awnings open automatically in cloudy weather to increase the available light. In winter they reduce noise from rain and hail and protect the window from an accumulation of snow and leaves.

- Traditional pivot operation with raised axis to enable even tall people to stand in an open window. Counterbalanced pivot mechanism
- Increased window height using traditional widths
- Windows turn through 160° to clean outer pane from within the room
- Operating handle in the base of the sash for ease of use
- High quality close-grain vacuum impregnated pine guaranteed to be knot-free. Range of RAL colours to special order
- Available in conservation style
- Topsafe® system of burglary protection as standard
- 10 year warranty for window
- 20 year warranty for glazing unit
- Lifetime glazing unit hail resistance warranty

FGH-V Galeria

FGH-V Galeria

- The contemporary alternative to a dormer at far lower cost. Twin sash design has a lower element which opens to reveal built-in balustrades and an upper element which opens through 45° as a top hung window
- When closed, balustrades are hidden below the window, the profile of which is undistinguishable from a standard Duet window. With no element above the roofline there is no risk of dirt accumulating
- Use in combination with other roof windows using the K_/G flashing
- Also available in white, please ask for details

SMOKE VENTILATION SYSTEMS FOR PITCHED ROOFS

FSP SMOKE VENTILATION ROOF WINDOWS (EN12 10112: 2003)

Are electronically operated and activated by a smoke sensor built into the control unit. A signal from the sensor triggers automatic operation of the motor. The sash is hinged at the bottom and acts as a wind break allowing fast and effective smoke ventilation.

High energy-efficiency. Perfect thermal insulation parameters. The DEC-C U8 window with passive U8 (VSG) glazing unit is characterized by heat transmittance co-efficient for the whole window of $U=0.55 \text{ W/m}^2\text{K}$ according to EN1873 standard (for the size 120x120cm). Standard P2 glazing unit features coefficient $U=1.2 \text{ W/m}^2\text{K}$

Provides a large amount of natural light

Wide range of sizes

Window design allows for the installation of internal and external accessories

The domed flat roof window is intended for installation in a roof with a pitch of $0^\circ-15^\circ$. The flat roof window can be also mounted on an additional base with a height of 15cm, which raises the window and allows its installation, e.g. in green or living roofs

■ The D_F non-domed flat roof window is characterized by exceptional thermal insulation qualities and innovative design

■ Modern window bonding technology gives a highly aesthetic and innovative design. Provides a large amount of natural light

■ The D_F window can be manufactured in a wide range of sizes and is an ideal replacement for old skylights that

do not meet current thermal insulation parameters

■ To ensure the flow of water from the glass surface of D_F non domed windows, the window should be installed with a pitch of at least 2°. Flat roofs generally have a pitch of 3-4°. The flat roof window can be also mounted on an additional base with a height of 15cm, which raises the window and allows its

installation, e.g. in green or living roofs

■ Window design allows for the installation of internal and external accessories

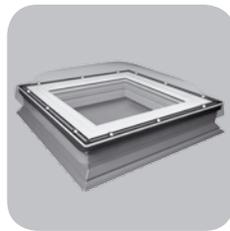

■ ZSD universal telescopic rod available for opening and closing flat roof windows and internal blinds, see page 70

*DU6 SECURE WINDOW OFFERS INCREASED LEVELS OF SECURITY AND ACHIEVES ANTI-BURGLARY RC2 AS PER EN1627 (DOCUMENT Q)
 **THIS WINDOW DOES NOT HAVE PASSIVE CERTIFICATION

Cross-section of type Secure flat roof windows

Secure type flat roof windows are available and feature anti-burglary properties. They are equipped with a number of features aimed at enhancing both safety and security parameters.

The type F windows (DMF DU6 Secure, DXF DU6 Secure) as well as the type C windows (DXC P4 Secure, DMC P4 Secure) comply with European anti-burglary class RC2 (EN 1627).

An abundance of natural light. The specially designed shape of the window profiles has a glazing area up to 16% greater than those of competitors.

D_F Secure windows come with a highly energy-efficient, double chamber DU6 glazing unit with a Class P4A anti-burglary inner pane. The whole window U-value is 0.70 W/m²K (EN 14351-1).

D_C Secure windows come with an energy-efficient, single chamber glazing unit with a Class P4A anti-burglary inner pane. The whole window U-value is 1.2 W/m²K (EN 12567-2).

The structure of the window enables installation of internal as well as external accessories.

The type F flat roof window is suitable for roof pitches between 2 and 15°, while the type F is designed for pitches between 0 and 15°.

CROSS-SECTION OF FLAT ACCESS ROOF LIGHTS

ACCESSORIES
page 64-66

Cross-section of flat access roof lights

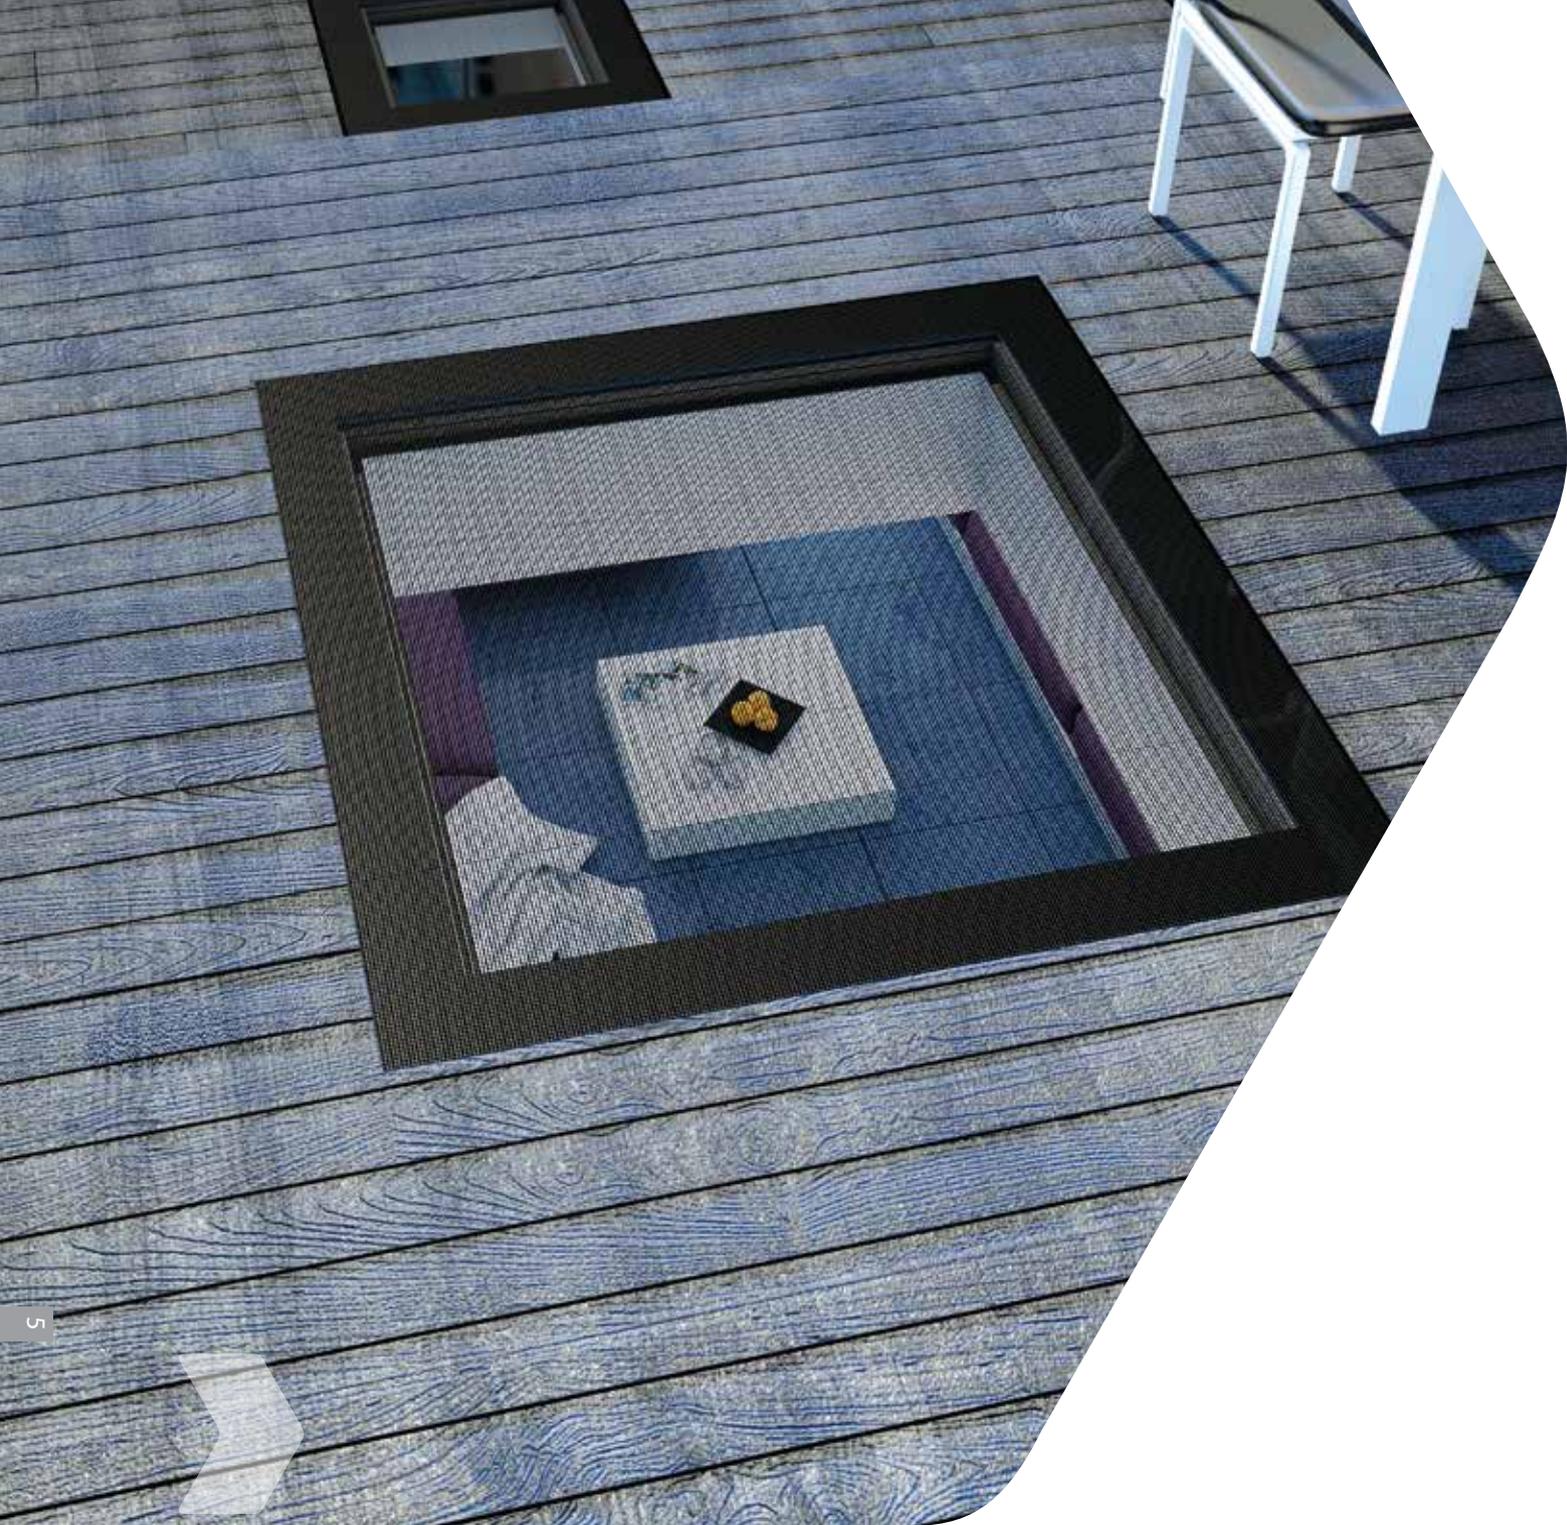

Provide safe and convenient access to the flat roof. Special hinges and functional opening system used in the access roof light ensure easy sash opening up to 80°. Gas springs facilitate operation of the sash and keep it stable in the open position, thus protecting against accidental closing. What is more, access roof lights feature increased safety of use thanks to the application of anti-slip covers on their profiles. window and allows its installation, e.g. in green or living roofs

The frame of the flat roof window is manufactured from multi-chamber PVC profiles filled inside with insulation material. In the DRF access roof light, the upper part of the window is equipped with innovative flat glazing unit and DRC has a dome made of durable polycarbonate.

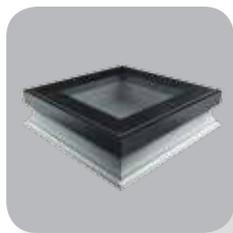

The type C flat access roof light is intended for roofs with pitches between 0° and 15°, while the type F flat access roof light is designed for installation in roofs

with pitches between 2° and 15°. Window can be mounted on an additional 15cm high base (XRD), e.g. for installation on a green roof.

The window design allows installation of both internal and external accessories (DRC internal accessories only). External awning blind protects the room from overheating, while internal accessories provide protection from intense sunlight and enhance interior design.

DXW WALK ON WINDOW

DXW

- The DXW flat roof window offers a completely new approach to be taken with flat roof design. Its specially strengthened sash and frame enable it to be installed completely flush within the roofline.
- With special design features such as enhanced load-bearing capacity and a lasting, non-slip surface you can walk across its surface freely.

DXW

- providing a surface level with the roof and a special non-slip surface to ensure complete safety when walking across it
- enhanced load capacity
- high resistance to break-in attempts thanks to reinforced design
- reduced heat loss (U_w=0.70 W/m²K)
- modern design and high quality finish
- quick and easy installation
- profiles which clamp the covering material and facilitate the finish of the window connection with the roofing material included as standard

- An abundance of natural light in buildings with flat roofs.
- The frame of the flat roof window is constructed of multi-chamber PVC profiles filled with insulation material. The upper part of the window comes with an innovative flat glazing unit.
- The window comes with passive, double-chamber glazing unit with a U-value of 0.50 W/m²K.
- Suitable for roof pitches between 0° and 15°.
- It is possible to install the same internal accessories which are used in all our type F flat roof windows.

Cross-section of smoke ventilation flat roof windows

Smoke ventilation window DSF

Smoke ventilation window DSC

DSF, DSC smoke ventilation flat roof windows are used for extraction of smoke and heat emitted in a building during a fire. This is a perfect solution for stairwells where under normal operating conditions this window serves the purpose of room ventilation and lighting.

FAKRO smoke ventilation windows combine the standard function of a roof window with that of automatic smoke evacuation in a single product.

- An abundance of natural light in buildings with flat roofs.
- The frame of the smoke ventilation window is constructed of multi-chamber PVC profiles filled with insulation material.
- Easy opening to set the window in standard ventilation position (everyday flow of fresh air).

- The sash raises to a height of 23cm when used for everyday ventilation, but in the event of fire it raises to 50cm. Elements of the sash lifting mechanism are not visible with the window closed.
- Opening mechanism and two or four 24V actuators ensure perfect operation and ease of access for maintenance purposes.

- Suitable for roof pitches between 0° and 15°. When installing windows must be level.

PRICE INCLUDES THE ACCESS DOOR AND THE LML LOFT LADDER AS INDIVIDUAL ITEMS FOR ON SITE INSTALLATION

■ The DRL roof access door is an innovative product providing safe and comfortable access to the flat roof. Its structural durability and range of sizes provide the perfect combination with a loft ladder.

■ The sash can be opened up to 60°. Gas springs facilitate opening and closing and the sash can be left in open position. Anti-slip tape on the base ensures safe access to the flat roof.

■ Sizes of the roof access door are adjusted according to the size of loft ladder (loft ladders are sold separately - see Loft Ladder Catalogue).

■ Can be mounted on an additional XRD/W base with a height of 15cm, for installation in green and living roofs. Option to install an additional ZBR lock which protects against accidental closure of the sash.

■ Suitable for roof pitches between 0° and 5°.

WHITE POLYURETHANE CONSERVATION WINDOWS ARE ALSO AVAILABLE - PLEASE CONTACT THE FAKRO SALES OFFICE FOR FURTHER DETAILS

FAKRO has an extensive range of conservation roof windows and also routinely manufactures products to bespoke design requirements. The characteristic features of such windows are their black vertical mullion bar, cladding and flashing (to RAL9005) but from a user's perspective they offer all of our standard features and contemporary interior styling. As such, we offer a choice of natural pine, white acrylic, white PU-coated pine and PVC windows.

Whether for a listed building or a traditional barn conversion, FAKRO conservation style roof windows offer the critical facility to install them low within the roof line. Three depth options are available to suit all coverings:
 Standard depth (denoted by the last letter 'V' e.g. EZV) Installation 3cm higher than standard depth (denoted by the last letter 'N')
 Installation 3cm lower than standard depth (denoted by the letter 'J')
 For conservation roof windows 'J' flashings are most commonly used to provide the required low profile. Flashings available are as follows:
EEJ/C - sheet metal roof coverings e.g. zinc, copper, stainless steel
ELJ/C - natural and man-made slates, etc. up to 8mm thick
EPJ/C - plain tiles (clay, non interlocking tiles)
ESJ/C - shingles e.g. cedar, asphalt, felts etc.
EZJ/C - profiled roof coverings up to 45mm in depth e.g. Double Pantile.

RECESSED FLASHINGS DO NOT ALLOW THE WINDOW TO SIT FLUSH OR BELOW THE ROOF LINE

FLASHINGS

■ Correct choice and installation of the roof window flashing is essential. FAKRO not only supplies flashings to enable roof windows to be installed with any type of roof covering but enables windows to be fitted at 3 key depths. This is particularly valuable with the installation of conservation roof windows which invariably need to sit low within the roof line.

■ The basic colour of FAKRO flashings is grey/brown RAL 7022 but conservation flashings are black (RAL 9005), to match the cladding and mullion bars.

You can install a FAKRO roof window at any of 3 depths

V - This is the standard depth and ideal for tiles such as the Double Roman

N - 3cm higher than the standard depth, for high profile tiles such as the Bold Roll

J - 3cm deeper than the standard depth – ideal for fitting the window lower into the roof line

No other roof tile manufacturer offers a choice of 3 depths

NOTE: WINDOWS DO NOT SIT FLUSH OR BELOW THE ROOFLINE.

STANDARD FLASHINGS ALLOW WINDOWS TO BE INSTALLED IN THE MOST POPULAR TYPE OF ROOF COVERINGS

NOTE: THE DISTANCE BETWEEN WINDOWS JOINED HORIZONTALLY AND VERTICALLY IS NORMALLY 10CM. IF EXTERNAL SHUTTERS ARE INSTALLED ON WINDOWS INSTALLED VERTICALLY, A GAP OF AT LEAST 20CM IS REQUIRED. OTHER SIZED GAPS CAN BE MANUFACTURED FOR FURTHER INFORMATION PLEASE CONTACT CUSTOMER SERVICES OR EMAIL.
THE STANDARD DISTANCE BETWEEN WINDOWS POSITIONED SIDE BY SIDE IS 10CM - THE OPTION OF 18MM/40MM AND 50MM GUTTER CHANNELS ARE AVAILABLE IN CERTAIN CIRCUMSTANCES - PLEASE CONTACT THE FAKRO SALES OFFICE FOR FURTHER DETAILS

B2/1
horizontal
combination

B1/2
vertical
combination

B2/2
block
combination

Flashing systems are ready made flashing combinations for joining windows in the groups: horizontally, vertically, and in a block. The distance between the windows joined horizontally and vertically is normally 10cm. There are seven modules in the FAKRO combination system to cater for any layout you may require.

ROOF WINDOW ACCESSORIES

FAKRO roof window accessories combine quality, choice of design and ease of fitting with lasting performance. A wide range of styles and colours ensure that you can select blinds to suit any interior décor. Venetian, pleated, blackout and ARP roller blinds are supplied in aluminium cassettes that fit within the window sash to provide an effective light screen. Material swatches can be seen in greater detail in the FAKRO Roof Window Accessories brochure which can be downloaded from www.fakro.co.uk. In addition, you can request a colour swatch by phoning our Sales Office on 01283 554755 and order using our online shop.

**Venetian blind
AJP**

- ability to control the amount of incoming light to the room
- control the direction of light entering by changing the angle of the slats

**Roller blind
standard
ARS**

- protection from light
- can position the blind in three different positions

**Dimming
roller
blinds
ARP**

- protection against sunlight during sunny days
- possibility to lock the blind in any position

You will see 3 price groups: Price Group I consists predominantly of plain colours while those in Groups II and III offer a wide range of patterns. With external awning blinds, Group II products are also made using a closer density fabric which greatly reduces the amount of light which can pass through it.

Note: When looking at blinds on any website other than www.fakro.co.uk we recommend that you check with us as some show our logo but DO NOT sell genuine FAKRO products.

Blackout blinds ARF Sunset

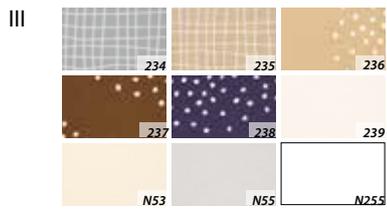

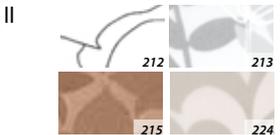

- very good protection from sunlight
- the possibility of darkening the room
- possibility to lock the blind in any position
- partial protection from solar heat
- Also available for flat roof windows type C and F. With manual control (ARF/D) and wireless Z wave electric control (ARF/D Z-Wave). See page 60.

A children's room is a special place in every home which deserves a particular attention. It should not only be functional, but above all friendly to the youngest. Blackout blinds ensure harmony with the décor of any room and protect it from overheating, while your kids can enjoy comfortable conditions both for playing and learning. Having children in mind, we have created a unique collection of DreamWorks&Fakro blinds. Characters from such movies as 'Trolls', 'How to Train Your Dragon', 'Kung Fu Panda' or 'Penguins of Madagascar' will make your children able to invite to the room their favourite heroes.

ACCESSORIES FOR FLAT ROOF WINDOWS

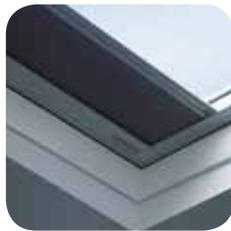

INTERNAL - BLINDS

- roller blind protects against harsh sunlight and provides a decorative element.
- Provides a pleasant shaded interior on even the sunniest day.
- With the use of guides, the blind can be positioned at any point giving gradual reduction of incoming light, until the blackout.
- Available in two versions of control:

ARF/D

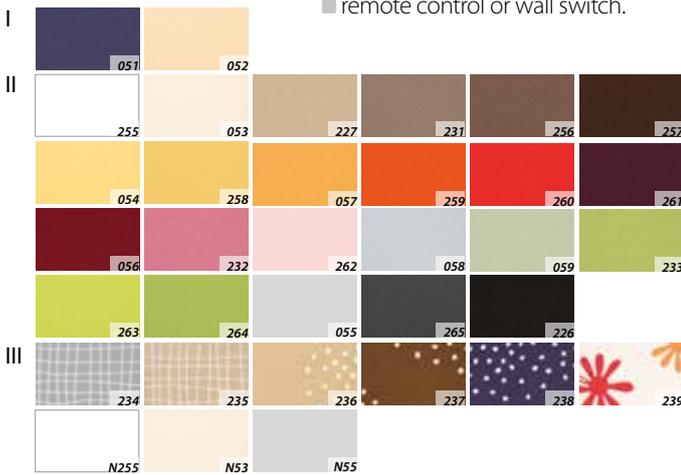

- Control:
- manual.

ARF/D Z-Wave

- in wireless Z-Wave system,
- powered for the mains.

- Control:
- remote control or wall switch.

THE MATERIAL SAMPLES PRINTED CAN DIFFER IN COLOUR FROM THE ACTUAL PRODUCT.

EXTERNAL - AWNING BLINDS

- Awning blind absorbs solar radiation before it reaches the glass and emits heat outside, thus on sunny days protects interior against burdensome heat.
- Awning blind- up to 8 times more effective protection against heat when compared with blackout blind.

AMZ/F Solar

- for roof windows type F,
 - comfortable use, automatic operation of the awning blind (the photovoltaic panel works as a sensor, which reacts to solar radiation. In bright sunlight the awning blind unrolls automatically and rolls up during the cloudy weather),
 - powered by solar batteries.
- Control :
- automatic operation or remote control.

AMZ/C Z-Wave

- for roof windows type C,
- in wireless Z-Wave system,
- an innovative system enables installation of the awning blind below the window's dome,
- powered for the mains.

- Control:
- remote control or wall switch.

THE MATERIAL SAMPLES PRINTED CAN DIFFER IN COLOUR FROM THE ACTUAL PRODUCT.

WHEN INSTALLING THE AMZ/C Z-WAVE ON DXC AND DMC WINDOWS, POWER SUPPLY AND REMOTE CONTROL HAVE TO BE PURCHASED ADDITIONALLY.

Z-WAVE ELECTRICAL CONTROL ELEMENTS

ZWS 12
£240

ZWS 230
£265

ZWS 12 / ZWS 230

■ Z-Wave motor used for operating windows (controller and ZZ60 power supply have to be bought separately).

£70

ZWK 10

■ Z-Wave wall keyboard control can operate several receivers separately.

£70

ZWP 10

■ Z-Wave remote control, can operate several receivers separately or in groups.

ZWG 1
£140

ZWG 3
£152

ZWG 1 / ZWG 3

■ Z-Wave touch keyboard can operate one receiver separately or in groups. Available in triple version.

£120

ZWL 1

■ Button and radio module installed in flush mounted box, used for remote control of single Z-Wave receiver or in groups. Available in double and triple version.

ZZ 60
£88

ZZ 60H
£88

ZZ 60 / ZZ 60h

■ Impulse power supply 15VDC to power electric receivers (available in hermetic casing ZZ60h)

£80

ZWMA 1

■ A Z-Wave adaptation module used to control one receiver separately or in groups by use of wall button or other control system (230V AC).

£162

ZWMA

■ Z-Wave adaptation module used to control up to four receivers separately or in groups by the use of wall button or other control system (230V AC).

£124

ZWMP

■ Weather module used to control Z-Wave receivers by the use of rain sensor ZRD, wind sensor ZWD or smoke sensor ZFD.

£72

ZRD

■ Sensor in co-operation with ZWMP module, in case of rainfall ensures automatic closing of Z-Wave windows.

£58

ZWD

■ Sensor in co-operation with ZWMP module, in case of strong gusts of wind automatically closes Z-Wave windows.

£76

ZFD

■ Sensor in co-operation with ZWMP module, in case of detecting visible smoke, automatically opens Z-Wave windows.

ACCESSORIES FOR OPENING WINDOWS

ZBH

■ Handle with lock

ZBB

■ Window restrictor

ZBL

■ Window lock

ZSZ

■ Control rod for operating awning blinds, length 150cm

ZST

■ Telescopic control rod enables the user to operate ARS, ARF, AJP, AMS. It also enables easy opening and closing of windows

ZSD

■ Universal telescopic rod for opening DMC, DMF flat roof windows as well as internal blinds intended for these windows

INSTALLATION ACCESSORIES

FAKRO installation accessories guarantee quick and easy connection between the roof window and the roof construction. Using XDP insulating set and XDS air-tight flashing ensures the complete protection of a fitted roof window. The installation accessories reduce the risk of thermal bridging and guarantee the proper draining of any moisture around the FAKRO window. Using original installation accessories will allow the proper use of the windows for many years.

OTHER PRODUCTS

SOLAR PANELS

FAKRO solar panels can be installed either independently or together with FAKRO roof windows in visually appealing combinations using standard flashings. Solar panels are becoming increasingly popular as an eco-friendly way of harnessing the sun's energy to heat water.

LIGHT TUNNELS

In order to supply interior with natural light where there are no opportunities to install roof or vertical windows, an effective solution can be a light tunnel. Dimly lit interiors without access to the natural light can become light and comfortable to use. There are a few types of light tunnels available: SRT with rigid light transmitting tube and SLT with flexible light transmitting tube. Flashings enable installation of light tunnels in nearly every roof covering and even in flat roofs.

Note: SLT Plus Light tunnel includes 300cm of tubing, flashing and a light, bulb not included. Please specify which flashing (slate or tile) when ordering. SRT Plus Light tunnel includes the tunnel, flashing and a light, bulb not included. Please specify which flashing (slate or tile) when ordering.

WOODEN FOLDING SECTION LOFT LADDERS

STANDARD
EN 14975

U=1.1
W/m²K

CLICK

■ Low weight and innovative way of hooking the hatch on the so-called 'click' allows for installation of the loft ladder by one person.

■ As the hatch is opened the hinge moves it away from the ladder, thus increasing space for added convenience.

■ Insulated white hatch and handrail.

The **LWK Komfort** ladder's innovative design ensures ease of use, a high insulation value and quick installation. It is equipped with an aesthetically pleasing, smooth white finish to the hatch, and a handrail as standard.

SEE: COMPLETE GUIDE TO LOFT LEADERS 2017

▶ LOFT LADDERS

FAKRO 3 and 4-part folding loft ladders have been designed to combine exceptional quality and value with ease of installation and use. Timber ladders are made exclusively using the same close-grain, pine as that used for FAKRO roof windows and supplied either with an integral 36mm insulated hatch (U-value of 1.1 W/m²K) or, with the **LTK Energy**, a 66mm hatch (U-value 0.68W/m²K). Pine ladders have an edge-sealed pine frame and an adjustable spring mechanism which makes opening and closing easy and locks the ladder in position when open.

Hatches are of white or beige HDF while treads, which have grooves cut into them for added safety, are fitted to the legs using dovetail joints. Up to 13 standard hatch options are available, with non-standard sizes available for the **LWS Smart** and **LWK Komfort**.

The **LMF** folding metal loft ladder offers an exceptional fire rating of 120 minutes. Specially designed hinges and springs ensure that it can be opened and closed quickly while providing a load bearing capability of up to 200kg. Installed in the same manner as our pine ladders, the **LMF** is fitted with a steel supporting frame and fully adjustable legs. 13cm wide anti-slip treads offer improved safety while an additional step at the top provides greater convenience when exiting the loft.

Range of optional accessories available. See our loft ladder brochure for details
